

Design and implement a competitor to Stack Overflow Website.

Use cases:

1. Top questions are to be shown in the home page
2. Users can create a profile
3. Users can post a question, tag a question
4. Users can answer to a question. Rich media content (photos/videos) can be added as an answer.
5. Users can answer to an answer.
6. Users can vote to an answer or question
7. User can search the tags and browse the questions by tags
8. Users can search questions/answers by text

You are free to make your own assumptions and improvisations.
